

Community Education

Car Seat Safety, Installation And Best Practices

MyMichigan Health has certified car seat technicians (CPST's) that are available to answer questions about car seat safety, including installing car seats and booster seats. CPST's can also provide education and resources to parents, or expecting parents, on car seats, and even teach you how to properly install and use your car seat.

MyMichigan Health's CPST's participate in community education events and also offer free appointments for car seat checks. For those who cannot afford a car seat, MyMichigan may be able to provide a car seat at no charge.

Those who would like more information on upcoming events, or to schedule a car seat check appointment, may email CommunityHealth@mymichigan.org.
